Apart yet A-Part

We want to establish your business, even from scratch, and all the way to the creation of wonder. We analyze the present and envision the future! We focus on your business and we are right beside you to make it better. We want to develop and deliver the solutions which are as thriving and innovative as your business requirements are. We believe that there are unlimited possibilities.

We believe that the dimensions are UNLIMITED . . .

Nanosoft Technologies

Nanosoft Technologies has been in operation since August 2004. We are the technology services company with a reservoir of highly skilled IT professionals. We are focused on designing solutions that improve the way businesses and people communicate with each other. We have built strong and proven competencies in business analysis and process development to provide solutions to business challenges. We have trained and experienced ourselves to create solutions for your unique business needs.

Our key differentiating areas:

Business Analysis catering for the complete domain of marketing analysis and strategies development-solving problems from business process perspective.

Customized solutions development and Implementation, both stations based and web solutions.

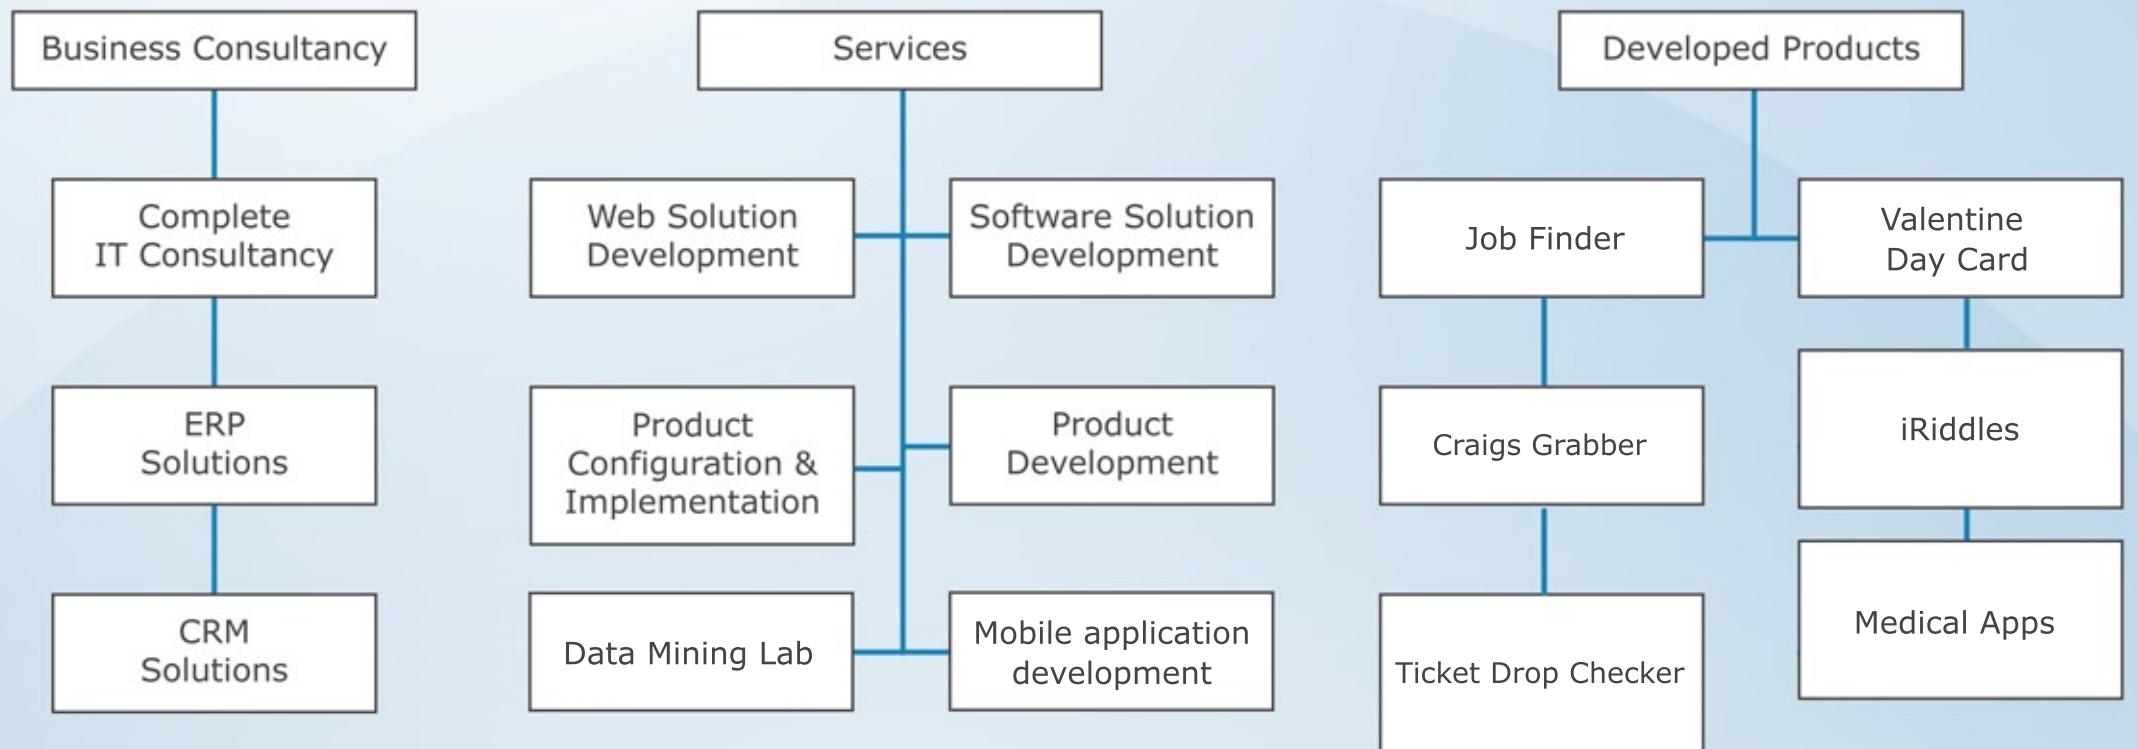

Infrastructure setup analysis and implementation.

Apple iPhone | iPad | iPod Touch Games and Applications Development.

Competent and synergized team of data mining lab.

Nanosoft Solutions

Nanosoft knows that every business is unique and requires a completely new approach and solution. We help you find simple, effective and quick solutions that fulfill your business. We believe in providing complete end-to-end solutions with the highest levels of quality for all your business needs.

Mobile Application Development:

Nanosoft is on the fast track of Mobile Application Development, and has sustained a broad experience in it. Our department is called “iMakerz” which is designated as a mobile application majesty. This department is focused on developing iPhone, iPad, iPod touch, and Android applications.

Key Areas Of Specialization:

- ✓ **Business Application**
- ✓ **Money and Finance Application**
- ✓ **Entertainment Application**

- ✓ **Travel Application**
- ✓ **Sports and News Application**
- ✓ **Weather Application**
- ✓ **Utility Application**
- ✓ **GPS Navigation Application**

Data Mining Lab:

Web Scraping is a technology that targets website databases that are visible only as HTML web pages, and create a local, identical replica of those databases as an information or result. With our web scraping & web data extraction service we can capture web pages, then pin-point specific pieces of data/information you'd like to extract from web pages.

Web Scraping/Web Data Extraction Component

- ✓ Workflow Management
- ✓ Web Spider / Web Crawler
- ✓ Data Cleansing and Transformation
- ✓ Template Web Data Extraction
- ✓ Data Quality Tracking
- ✓ Automated Form Submission

You can use our Web Scraping & Data Extraction Service to:

- ✓ Aggregate real estate info
- ✓ Generate your personal sales leads
- ✓ Collect financial data and profiles of public companies
- ✓ Build your own amazon product catalog
- ✓ Build your own osCommerce product catalog
- ✓ Watch on your competitor's website
- ✓ Verify email address
- ✓ Check email id existence
- ✓ Ebay Data Extractio
- ✓ Buy.com Monitering services

Microsoft Dynamics AX Customization:

Microsoft Dynamics AX is one of the majors on-going solutions in the international markets due to its diversified and user-friendly nature.

Nanosoft has the capabilities and the required resources to not only understand your requirements to the last details but also to provide you with the solution which best suits your requirements.

Nanosoft takes away your pain and delivers you the functionalities as per your Requirements. We mould the solution to meet your requirements, not your business processes to meet the system requirements.

Nanosoft believes that these solutions should complement your business processes and not derive them. With the domain, industry and the hands-on knowledge of the solution in and out, we have already begun our journey in the customization regime and have major on-going projects for Microsoft products.

- ✓ **Microsoft Dynamics AX**
- ✓ **Microsoft Dynamics CRM**
- ✓ **Microsoft Office Share Point**
- ✓ **X++ Programming**
- ✓ **X++ to SSRS Reports Conversions**
- ✓ **AX Enterprise Portal**
